DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: the allowability resides in the overall structure of the device as recited in independent claims 1 & 8, and at least in part, because claim 1 & 8 recites: "wherein the frame and the shield bracket are made of flexible electrically conductive material and the frame includes a plurality of tabs arranged around the opening. The aforementioned limitations in combination with all remaining limitations of claims 1 & 8 are believed to render the claims and all claims dependent therefrom patentable over the art of record.

US 6661670 B1 to Eckberg et al. is considered a close reference to the instant application. Eckberg et al. disclosed a shield bracket (40), but is silent as to a frame having a plurality of tabs around the opening of the frame.

US 6349043 B1 to Jensen et al. is considered a close reference to the instant application. Jensen et al. disclosed a frame (26) made of a flexible electrically conductive material, further comprising spring fingers (28,34), but is silent as to a plurality of tabs around the opening of the frame. The aforementioned limitations in combination with all remaining limitations of claims 1 & 8, are believed to render the claims 1 & 8 and all claims dependent therefrom patentable over the art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
